

DURAPAK DURANETS

Duranets are suitable for protecting Silage Clamps and Big Bales. Duranet comes in 2 different sizes:

- 15m x 10m
- 15m x 20m

The small net (15m x 10m) will cover approx.

60 - 65 bales on the flat or in a stack three high.

The large net (15m x 20m) will cover 140 bales on the flat and 233 bales in a stack 3 high

(i.e. 12 x 8 + 11 x 7 and 10 x 6).

DURANET INSTRUCTIONS

Please read the following instructions carefully to ensure that your Duranet is used correctly: -

1. Place tyres on top of the pit or bale stack to ensure the net is raised off the pit or stack and that birds cannot land on the polythene.
2. Two people are needed to pull the Duranet over the top of the pit or stack.
3. The Duranet should be firmly secured to the ground using weights (such as tyres, lime in bags etc) at the ends and sides of the pit or stack.
4. Finally, your Duranet should last for many years with proper handling and when not in use fold the net carefully and store indoors.

Further information can be obtained from your local Durapak Agri stockist or by writing to: -

Durapak

Crop Protection

Design by DMdesign 021 4882291 www.dmdesign.ie

**Agri Tape, Patches,
Silobags, Silonets,
Silage Covers & Duranets**

GENERAL PURPOSE AGRICULTURAL TAPE

Suitable for joining and repairing silage covers, repairing and sealing plastic fertilizer bags, silage bales etc.

- Rolls 20m in length
- 75mm (3 inches) width
- Caution- surfaces need to be clean, dry and free from grease

DURAPAK HI-TAC PATCHES

Durapak Hi-Tac patches are perforated every 5 inches and are suitable for repairing silage bales, silage sheets, fertilizer bags etc.

- Rolls in 31m in length
- 75mm (3 inches) width
- Perforated every 12cm (approx. 5 inches)

DURAPAK CO-EXTRUDED SILAGE COVERS

Durapak's range of silage sheeting provides effective exclusion of air and water ensuring the production of top quality silage.

- Sizes:**
- 24' x 75'
 - 36' x 75'
 - 42' x 75'
 - 46' x 75'
 - 46' x 80'
 - 52' x 80'
 - 57' x 80'
 - 60' x 80'
 - 46' x 110'
 - 52' x 110'
 - 57' x 110'
 - 60' x 110'

Thickness: 500 and 600 gauge

Colour: Black and Black & White

Packaging: Each cover is individually packed in an outer wrapper with a label showing the dimensions in metres and feet. Available in rolls or packs

DURAPAK'S SILAGE BAGS

Durapak's Silage Bags provide effective exclusion of air and water to provide you with top quality silage.

- Extra large 60" x 86" x 100"
- 440 gauge (This is the only 440 gauge bag on the market today!)
- Carbon black ultra violet inhibitor
- Suitable for all 4' x 4' bales
- 10 bags per plastic outer, 400 bags per boxed pallet

SILAGE PROTECTION WITH SILONETS, SILOBAGS & EASILO

SILONET

Silonets are designed to protect silage plastic film. In trials Silonets have been shown to give better protection than 10cm of sand or earth. Silonets are much easier to handle and are much safer than either sand or earth.

Overall Silobags and Silonets lead to faster and more efficient pit covering and are more environmentally friendly. Call for further details

MAIN FEATURES

- Woven protection net
- High density polyethylene monofilament
- Weight 195g/m²

MAIN BENEFITS

- Designed to protect silage plastic film
- Easy to handle
- Much safer than sand or earth

SILOBAG

Silobags are designed to hold plastic film in place. The bags are filled with gravel or stones (Sand should not be used unless bags are used as flood deterrent because it absorbs water that can freeze and this is not ideal).

Each silobag, which will cover about 1m in length or just over 3ft, has a closing twine incorporated and is the only bag on the market with such a closing mechanism.

They help in speeding up the pit covering operation. Silobags are particularly good along walls and are much better than fertiliser bags or tyres. Silobags also prevent silage contamination as earth or manure or water can lodge inside old tyres.

Additionally, old tyres can have wire protruding which can damage silage plastic. This is not a problem with Silobags which are much safer and cleaner.

Silobags also come with a 7 year guarantee.

MAIN FEATURES

- High density polyethylene monofilament
- Can be filled with gravel or stone
- Handle and closing twine
- Safe and clean to use
- UV stabilised for 7 years

MAIN BENEFITS

- Silobags hold plastic film in place
- Fully protect silage
- Leading to improved silage quality
- Reduce losses
- Save labour and speed up silage pit closing process

Save your Silage with Silonet, Silobags & Easilo

Silobags should be ideally filled with gravel or small stones where they are being used to keep silage film in place

UNIQUE INCORPORATED CLOSING MECHANISM
